

Amphenol Backplane Assembly & System Integration

Amphenol-BSI have been designing, assembling and testing backplanes for more than 30 years. Our experience of backplane design, manufacturing, development and electrical test technologies allows us to deliver the highest performance backplane at a product cost you can bring to the market. As part of the Amphenol Corporation, we continue to invest in our technologies to ensure we remain positioned as the most extensively tooled Backplane Supplier in the industry.

Amphenol-BSI VME64x 6U 12-slot Backplane

Amphenol-BSI's range of VITA compliant backplanes includes VME64x. Our 6U 12-slot VME64x backplane is one of the varieties of ABSI's VME64 backplane products.

We understand that all applications may require fully customisable backplanes which is why ABSI continue to invest in our Engineering team to provide our customers with a Solution Provider that they can trust and grow in partnership.

Power Delivery

- x10 Ground locations
- x4 +3.3V locations
- x4 +5V locations
- x1 +12V location
- x1 -12V location

PEM Broaching Standoff	
Thread size x Pitch	M3 x 0.5
Height from PCB surface	4mm ±0.13
Material	Carbon Steel
Current rating	25A

General Information

- ANSI/VITA 1-1994 for VME64
- ANSI/VITA 1.1-1997 VME64 Extensions
- Utility connector for signal access
- Active daisy chain
- Optional passive or active termination
- Optional RTM assembly
- Multiple power locations for distributed delivery
- Edge plating to minimise EMI emissions
- Dimension: 262.05mm x 247.48mm x 3.20mm
- +5V Standby, +/-VS1 and +/-VS2 access

Fully Customised Solutions Available

Ordering Information

Backplane Profile Name	Mechanical			Electrical		
	Pitch	RTM	Manual Daisy Chain	Automatic Daisy Chain	Passive Termination	Active Termination
